BCCampus Presentation:

Canva AI: in the classroom

By Prabhjot Bhamra

Hello and thanks for joining us today! My name is Prabhjot and here's my exploration of Canva's integration of AI into its educational offerings and what that means for both teaching and learning.

Canva in Education

Canva for Education and
Canva for Campus

Canva, a web-based design tool, launched Canva for Education in 2020 for K-12. It has 25 million users worldwide, with under-13s needing parental consent. Canva for Campus, aimed at higher education, is growing, notably through a University of California partnership reaching 500,000+ users. Education accounts face limits unlike Campus ones, which have full AI and app access.

Case Studies

Case studies

Read examples of case studies in schools and discover how Canva for Education empowers teachers and learners globally.

 Canva

UC x Canva

From UC-Irvine's Office of Information Technology page:

Purchasing Canva for Employees Now Available -

Canva is no longer free for faculty and staff. It is still free for students.

Faculty and staff who wish to use Canva can purchase a license by [following the Order Instruction steps outlined in our knowledge base article](#). Students can obtain a free license by using the [Log in to Canva link](#) in the Quicklinks section above.

Canva Teams

Everything in Pro, plus:

- ✓ Scale your brand and centralize assets
- ✓ Ensure brand consistency with approvals
- ✓ Edit, comment, and collaborate in real time
- ✓ Generate on-brand copy with AI*
- ✓ Team reports and insights
- ✓ Pay as you grow
- ✓ 1TB of cloud storage
- ✓ Online customer support
- ✓ AI Admin Controls
- ✓ ISO 27001 certification and SOC 2 Type II compliance

Canva for Campus

Premium features include:

- ✓ Centralized admin controls and reporting
- ✓ Deploy to students via SSO
- ✓ Unlock premium access for students when you purchase Canva for your faculty and staff
- ✓ Scale your brand and centralize assets
- ✓ Ensure brand consistency with approvals
- ✓ Edit, comment, and collaborate in real time
- ✓ Built-in accessibility features
- ✓ LMS integrations
- ✓ AI Admin Controls
- ✓ ISO 27001 certification and SOC 2 Type II compliance
- ✓ Onboarding and training for staff and faculty
- ✓ Dedicated customer support

Looking for fewer than 25 staff licences? Try Canva Teams.

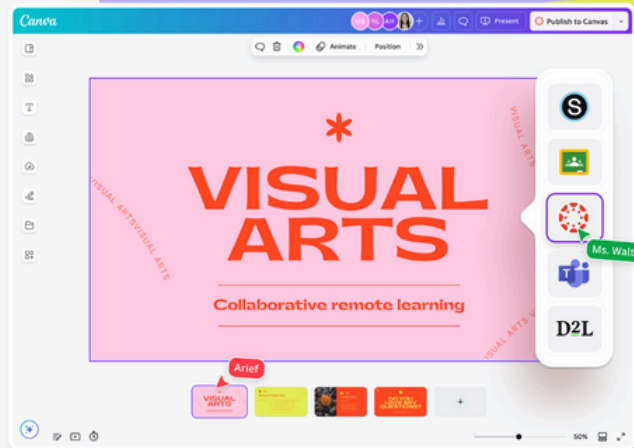

LMS Integrations

Integrate Canva with your LMS

Seamlessly integrate Canva with your learning management system. Set teachers up for success and drive student adoption.

Magic Write assists with starting projects, continuing writing, summarizing, rewriting, and other creative functions.

Magic Write

Powered by OpenAI and trained on public web pages. Does **not** use user content to train its model unless they opt in (not available in Education accounts).

Works in 20 languages.

Automated reviews of input prompts that might generate inappropriate content.

The user is responsible for the "Input" and "Output."

Not available to Students in Canva for Education accounts. But what about Canva for Campus accounts?

Powered by OpenAI and trained on web content until 2021, Canva doesn't use user content for training without permission but may use data from consenting users. Supporting 20 languages, it offers automated content reviews, yet users are responsible for their creations. Unavailable to Canva for Ed to deter plagiarism, Canva for Campus students have full AI access.

Magic Switch enables easy file format or size changes, significantly reducing prep time for teachers. Access can be restricted for students by admins and teachers but is fully available to Campus students. Its powering technology and K-12 access remain unspecified.

GLOBAL PLASTIC POLLUTION

BY THE NUMBERS

13 MILLION
tons of plastic
leak into the
ocean each year

500 BILLION
plastic bags used each year

100,000
marine animals
killed by plastics
each year

17 BILLION

barrels of oil used on
plastic production
each year

ONE MILLION
plastic bottles bought
every minute

83%
of tap water found to
contain plastic particles

100 YEARS
for plastic to degrade
in the environment

Example: Magic Switch

Give it a try! What are your impressions?

OVERVIEW OF GLOBAL PLASTIC POLLUTION

This summary provides a quick look at the severe issue of global plastic pollution. The facts and figures highlighted here present a grim picture of the current situation and emphasize the urgent need for action.

- Every year, 13 million tons of plastic end up in the ocean.
- 500 billion plastic bags are used annually worldwide.
- The production of plastic consumes 17 billion barrels of oil each year.
- Plastic pollution is responsible for the deaths of 100,000 marine animals annually.
- Every minute, consumers purchase one million plastic bottles.
- Research has found that 83% of tap water contains plastic particles.
- Plastic takes up to 100 years to decompose in the environment.]

In this example, an infographic on global plastic pollution becomes a summary. Notice the added argument enhancements. It highlights generative AI's potential and limitations, underlining the importance of user verification for accuracy and consistency.

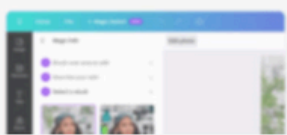

Editing with Canva's AI

Tools to easily edit

Magic Edit

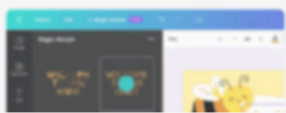

Watch and learn
Magic Edit lets you edit, replace, or add your image with a short written prompt.

Magic Edit
Unleash your creative vision and reimagine your image by adding, replacing, or editing your image.

Magic Morph

Watch and learn
With Magic Morph, you can effortlessly transform words and shapes with a single written prompt. Use Magic Morph to apply effects to text or a shape, and quickly create patterns and textures to take your educational materials to the next level in no time.

Magic Morph
Effortlessly transform words and shapes to elevate your educational content from ordinary to extraordinary.

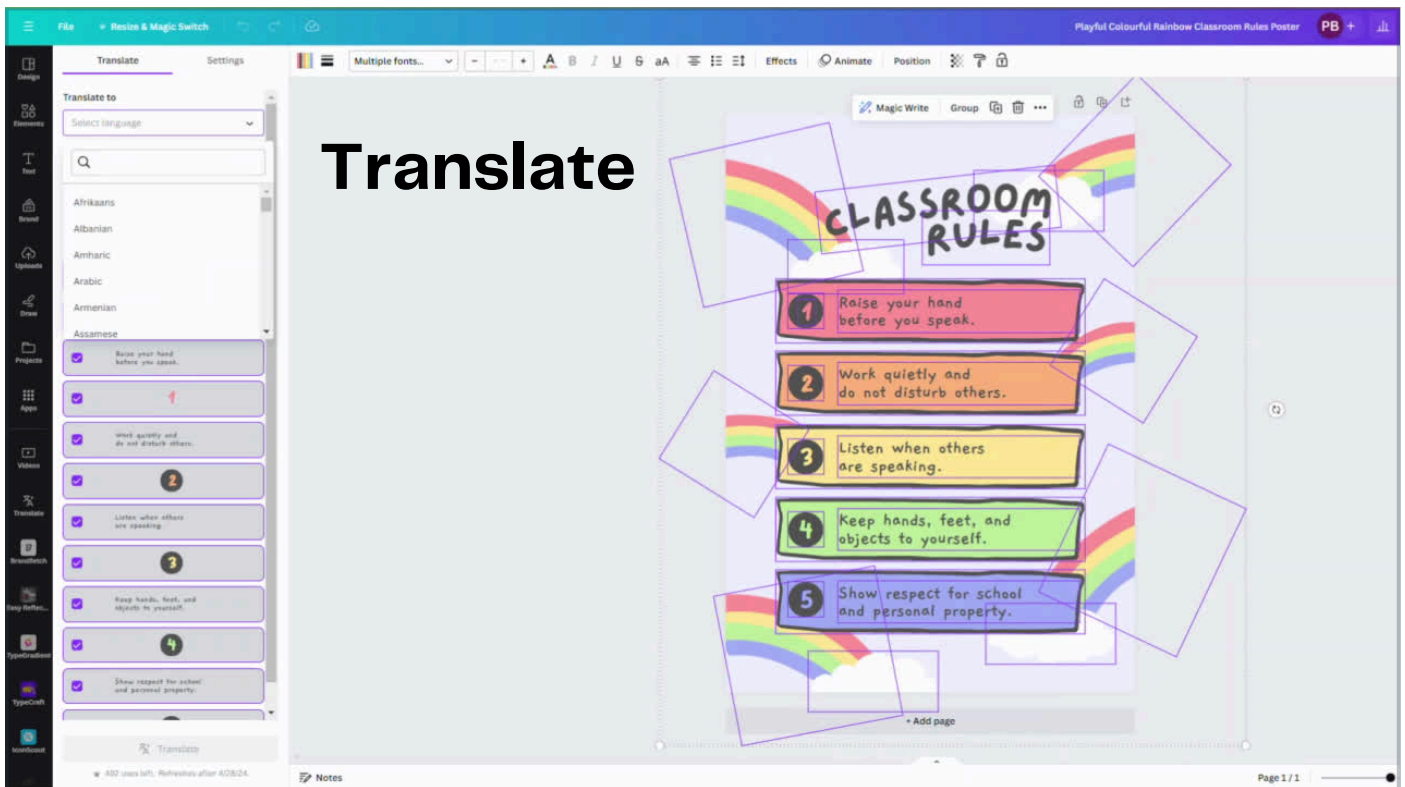

Magic Expand

Watch and learn
Extend an image in any direction. Magic Expand lets you, for enhanced training, add detail to images, or turn a vertical shot into a horizontal one in seconds.

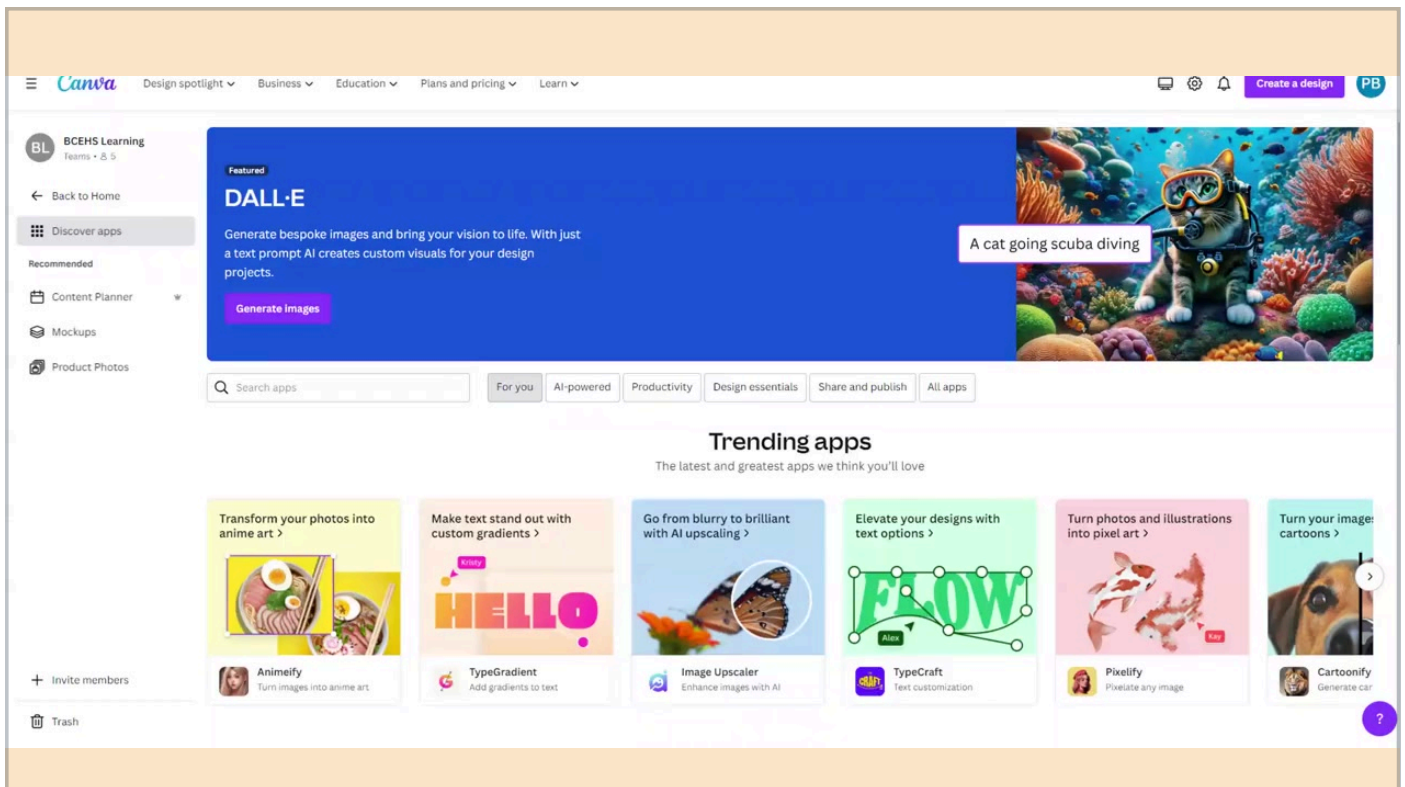

Magic Expand
Take your educational visuals further and extend an image in any direction.

Admins can choose teacher and student access for Canva's image editing tools. These tools highlight considerations around ethical AI image use and editing.

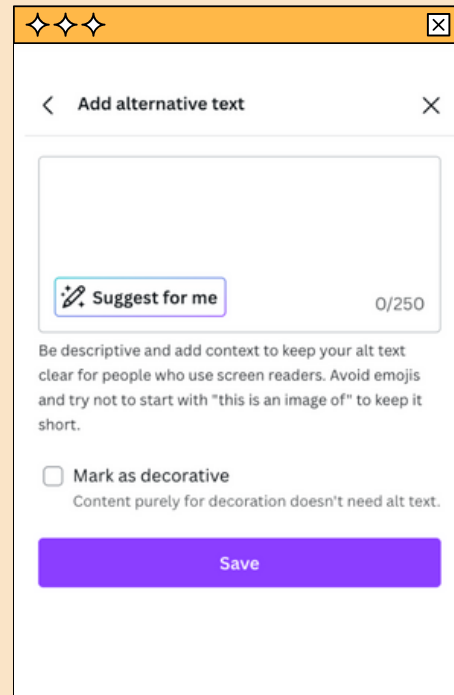

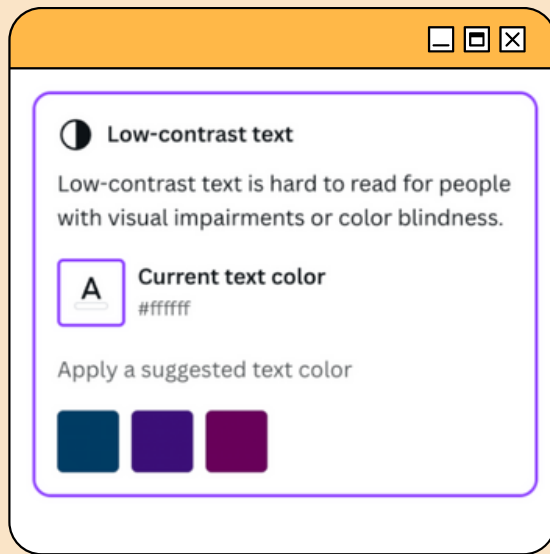

Canva for Education's Translate feature supports translating up to 500 pages monthly in over 100 languages, aiding educators in multicultural areas by enhancing accessibility for non-English speakers. While beneficial, its effect on language learning warrants consideration. Teachers and students have default access, subject to admin controls.

Canva's App Marketplace offers AI and social media apps outside its privacy policy. Teachers have default access, students require permission, and higher ed users get full access. Third-party app use demands accepting terms per project, boosting security through renewed consent.

Accessibility

Canva's alt text feature highlights images with contrasting colors for accessibility and flags missing alt text, offering a "Suggest text" option for convenience. Teachers can enable and educate students on this feature.

PRO

Visualize your ideas with Magic Design™

Create custom, on-brand, and attention-grabbing content in seconds. Describe what you'd like to see – or upload your media – and Magic Design uses Canva's AI to craft professional [presentations](#), [videos](#) or [social posts](#).

Magic Design

Is Magic Design free? ^

Access to Magic Design is included in Canva Pro, NFP, and Education accounts. If you're an administrator, teacher, or brand designer, you can choose who can access Magic Design in your team or class. Learn how to [change your teams' access to Magic Features](#). In addition, Magic Design for Video isn't available for students using Canva for Education. Teachers can access the feature, but can't grant access to students.

Accounts on a [Canva Free plan](#) have 10 lifetime Magic Design uses including Magic Design for Presentation and Magic Design for Video. The usage will be counted when a template is applied to the editor or when you click **Generate** for Magic Design for Video. Also note that during those 10 generations, if a presentation/video/design uses Pro assets, users will need to upgrade to a Canva Pro account or purchase each element separately.

Magic Design is accessible to teachers and students with admin permission, and teachers can further grant student access. It lets you generate presentations and videos with prompts.

It is important to note that students can use Canva's Free forever version, subject to monthly and lifetime limits on Magic features.

Let's take a deeper dive into ethical consideration regarding the use of these AI tools.

Assessments

◆◆◆

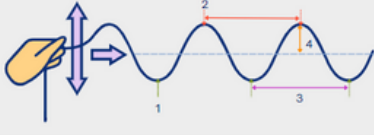

Transverse Waves

A REVIEW

In these types of waves, particles are **perpendicular** to the direction of travel.

A. Label the diagram below using the following keywords.

amplitude trough wavelength crest

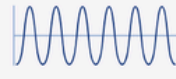

B. Extend the lines to match each part to its description.

amplitude	→	highest point in a wave
trough	↔	distance between two identical points in adjacent waves
wavelength	↔	lowest point in a wave
crest	→	height of the wave from its resting position

What's That Sound?

Below are different kinds of sounds. Identify an example for each and draw the correct sound wave.

A high-toned, airy sound from a whistle

high pitch sound

What's a real life example of this sound?

Add your graph here.

large amplitude

What's a real life example of this sound?

low pitch sound

What's a real life example of this sound?

small amplitude

Canva's pre-built lessons typically feature worksheets with minimal text, focusing on drag-and-drop, labeling, and drawing activities, preventing AI misuse.

Let's Build An Informational Text Hamburger

Step 1: Use books, articles and online resources to research floods. Explore how floods can impact people and the environment.

Step 2: Organize information using the Hamburger format.

Don't forget to:

- Introduce the topic clearly
- Develop the topic with details (facts, definitions, quotes, etc)
- Use connective words to link ideas
- Use precise vocabulary
- Have a concluding statement

 Topic Sentence	Add your answer here.
 Supporting Detail #1	Add your answer here.
 Supporting Detail #2	Add your answer here.
 Supporting Detail #3	Add your answer here.
 Supporting Detail #4	Add your answer here.
 Supporting Detail #5	Add your answer here.
 Concluding Sentence	Add your answer here.

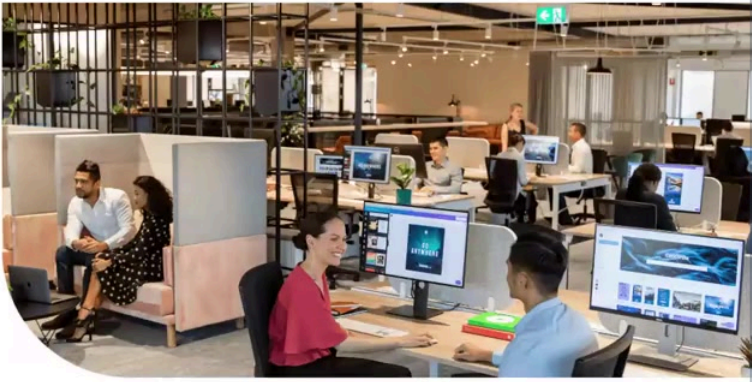

For written assignments, features like Magic Write and Translate are possible in worksheet instructions but not in answer boxes, potentially preventing plagiarism.

You're in safe hands with Canva Shield

We're committed to building the world's most trusted platform, including through the ways we use artificial intelligence. Canva Shield is our industry-leading collection of robust trust, safety and privacy tools providing peace of mind knowing you're always in control.

150M+
TRUSTED BY 150 MILLION PEOPLE

\$200M+
OUR COMMITMENT TO CREATORS

3B+
USES OF OUR AI PRODUCTS

200+
NEW DESIGNS PER SECOND

An industry leading approach

Driven by its guiding values of “be a good human” and “be a force for good,” Canva has proactively developed Canva Shield, an extensive array of trust and safety tools, to maintain ethical integrity throughout its offerings. Canva ensures that its generative AI products undergo thorough safety evaluations during their development phase and beyond.

Be a good human

Please be a good human when using AI Products and don't use them to create any harmful content. We will not allow any use of AI Products that violates these terms or Canva's [Acceptable Use Policy](#), and we may suspend or terminate your account if we find that you are using it in this way.

In addition to the matters listed in our [Acceptable Use Policy](#), it is prohibited to use AI Products to:

- Mislead anyone that the content generated by AI Products is human-generated;
- Provide medical advice or any content regarding the treatment, prevention, diagnosis or transmission of diseases;
- Provide legal or financial advice;
- Generate contracts or legally binding obligations;
- Generate political content including for dissemination in electoral campaigns;
- Generate source code;
- Generate spam, ransomware, keyloggers, viruses or other software;
- Generate nudity or shocking content including obscene gestures, bodily fluids or other profane subjects;
- Generate or disseminate information to be used for the administration of justice or other legal purposes;
- Implement fully-automated decision making.

Canva's AI Product Use guidelines create a strong ethical base yet depend heavily on user responsibility, raising potential for misuse. Canva's push for reporting inappropriate content faces practical challenges in education, emphasizing the need for careful AI tool selection and student education on ethical use.

Canva Shield: Our commitment to AI safety at school

We're committed to ensuring Canva is a safe, private, and secure tool for the classroom. As part of our mission to equip every classroom with the best technology to unlock creativity, we're providing each school district with the option of choosing if or when to enable these products for their students.

We know Canva is likely to be the first interaction teachers have with this technology and we take that responsibility incredibly seriously. We've also invested heavily in technology that ensures this new suite of tools is safe and appropriate for the classroom. With [Canva Shield](#), we're introducing a range of strict safety measures to provide students and teachers with peace of mind when using AI in the classroom. From robust trust and safety features to reporting functionality, automatic content moderation, and stringent student and teacher data protection, you're in good hands. We're also rolling out a number of additional classroom-specific safety measures including:

- 
- **Advanced Educator Controls:** School administrators are able to set access permissions to these AI tools based on what they're comfortable with.
 - **Automatic Reviews:** We use advanced technology to automatically review input prompts to prevent the creation of any inappropriate content.
 - **Blocked Terms:** As an additional precaution, we've blocked more than 10,000 words from being used in AI prompts to ensure content is safe for the classroom.
 - **Reporting Options:** We provide the ability to report and block any potentially unwanted terms or content.

Some additional classroom-specific safety measures Canva has in place are advanced educator controls, auto reviews, blocked terms, and reporting options.

4

Privacy and Data Security

How secure is student and teacher data in Canva?

Next, we have Privacy and Data Security.

Quick Facts

- * Data is stored in the US.
- * Only people added to a design can see it.
- * Settings for Canva for Ed users are disabled by default.
- * Educational institutions have direct control of student data at all times.

Quick privacy highlights:

Data is stored in the US.

Access to designs is limited to added members.

Canva for Education has fixed privacy settings; users can't change them, and student data isn't used for training.

Schools control student data and can request data reviews or deletion from Canva.

How does Canva develop and improve its AI features? ^

We're developing our AI features using a combination of:

- Content from creators that are part of the [Canva Creators](#) program and have consented to this. We've committed \$200 million to Canva Creators and Creator-driven AI over the next three years to ensure that our Creators can earn a viable income stream while helping fuel the creativity of millions of people around the world.
- Licensed content from stock media agencies and other partners. Contributors, creatives, and agencies receive royalty compensation for this licensing.
- Openly licensed content.
- User content from our users who have expressly consented and explicitly **opted in** to help support Canva in building better AI features.
- General usage and activity from our users who have not opted out. This includes things like **design metadata**, such as what color and font combinations are popular with our community and other anonymised information detailed below. Most importantly, this does not include your private design content, and you can choose to opt out at any time.

Our range of AI features are powered by a variety of models and technologies, including open source models developed by our partners. We do not allow our partners to train models on user content without express consent.

Here are some of the sources Canva credits for its AI features, which includes its Canva Creators, openly licensed content, and design metadata.

What is general usage and activity data, and how does Canva use it? ^

General usage and activity data covers information about how people use Canva, but never your user content. General usage and activity data includes things like:

- **Design metadata**, such as how people use layouts, colors, and fonts.
- **Analytic events**, such as what features you use, and which buttons you click.
- **Search queries**, such as what templates and graphics people search for.
- **Prompts** that are instructions or commands, such as prompts entered into Magic Edit, but this does not include the photo that you are editing.

We use this information to help build better products and features. For example, by knowing which fonts are most popular, we can provide better font combinations and suggestions. You can opt out of sharing this data with us at any time in [Privacy Settings](#).

This would include design usage and feature usage, search queries, and prompts, but not the content itself.

Data Collection

Data Element	Reason Data Element is Needed
School Name	Roster students, teacher, and staff in the right school
Grade Level	Roster students and teachers in the right school
Course Name	Roster students and teachers in the right course
Application Log in	To provide student, teacher, or staff access to the service
Application Password	To provide student, teacher, or staff access to the service
Student First Name	To provide student access to the service
Student Last Name	To provide student access to the service
Teacher First Name	To provide teacher access to the service
Teacher Last Name	To provide teacher access to the service
Teacher Email	To provide teacher access to the service
Staff First Name	To provide staff access to the service
Staff Last Name	To provide staff access to the service

Canva collects minimal data from students, educators, and administrators for login purposes, platform operation, and user access, adhering to data minimization principles.

U.S. Certifications

FERPA certified

Canva for Education is certified compliant with FERPA.

COPPA certified

Canva for Education is certified compliant with COPPA.

How does Canva help schools comply with children's privacy laws?

Canva is a signatory to the United States National Data Privacy Agreement (drafted by the Student Data Privacy Consortium) and has signed this model agreement with a number of States in the United States. For States or districts who have not signed onto the National Data Privacy Agreement, Canva offers a [Data Processing Addendum \(DPA\)](#) that is automatically incorporated into your agreement with us. Canva will also review data privacy and data sharing agreements at the State or district level. To find out how to enter into a National Data Privacy Agreement with Canva or provide an agreement for review, email edu-experts@canva.com. If you are ready to start using Canva, go to: <https://www.canva.com/education/>

**RESPONSIBLE
ARTIFICIAL
INTELLIGENCE**

Recommendations to Guide the
University of California's
Artificial Intelligence Strategy

University of California Presidential Working Group on AI
FINAL REPORT | OCTOBER 2021

Canva adheres to major US privacy laws like FERPA, COPPA, and NDPA, highlighting its commitment to privacy and security. However, educators and administrators bear the responsibility to meet national security standards. This commitment extends across Canva's educational services, demonstrated by its partnership with the University of California.

Third Party Services

✕ □ —

“The third-party service providers process student data for the sole purpose of delivering the Canva for Education service. If a school deletes their Canva for Education account, or requests the deletion of personally identifiable information associated with a student’s account, Canva will direct these services to delete any such information they hold.”

- Looker (Analysis of aggregated user behaviour data)
- Mode (Analysis of aggregated user behaviour data)
- MongoDB (Atlas) (data storage)
- Sentry (error monitoring)
- SheerID (teacher verification)
- Slack (platform support)
- Snowflake (data storage)
- Zendesk (user support)
- OpenAI (Canva AI products, only when enabled by the authorized school)

Canva openly acknowledges the 3rd party service providers it employs, and what schools need to know.

Bug Bounty Program

We invite security researchers to investigate vulnerabilities in Canva, so long as your research follows this responsible research and disclosure policy.

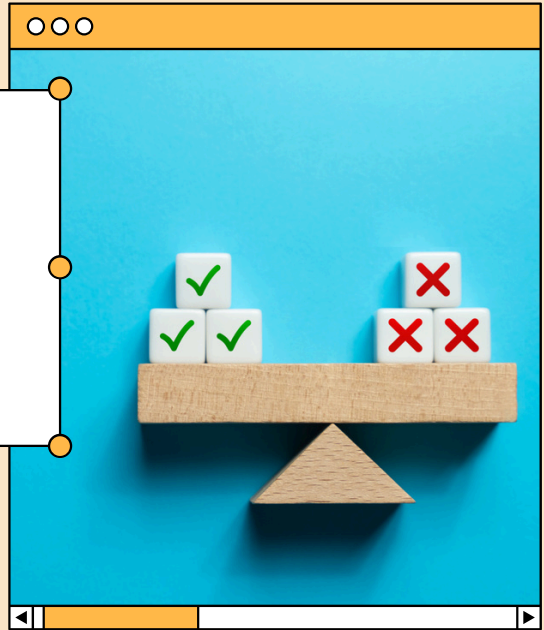

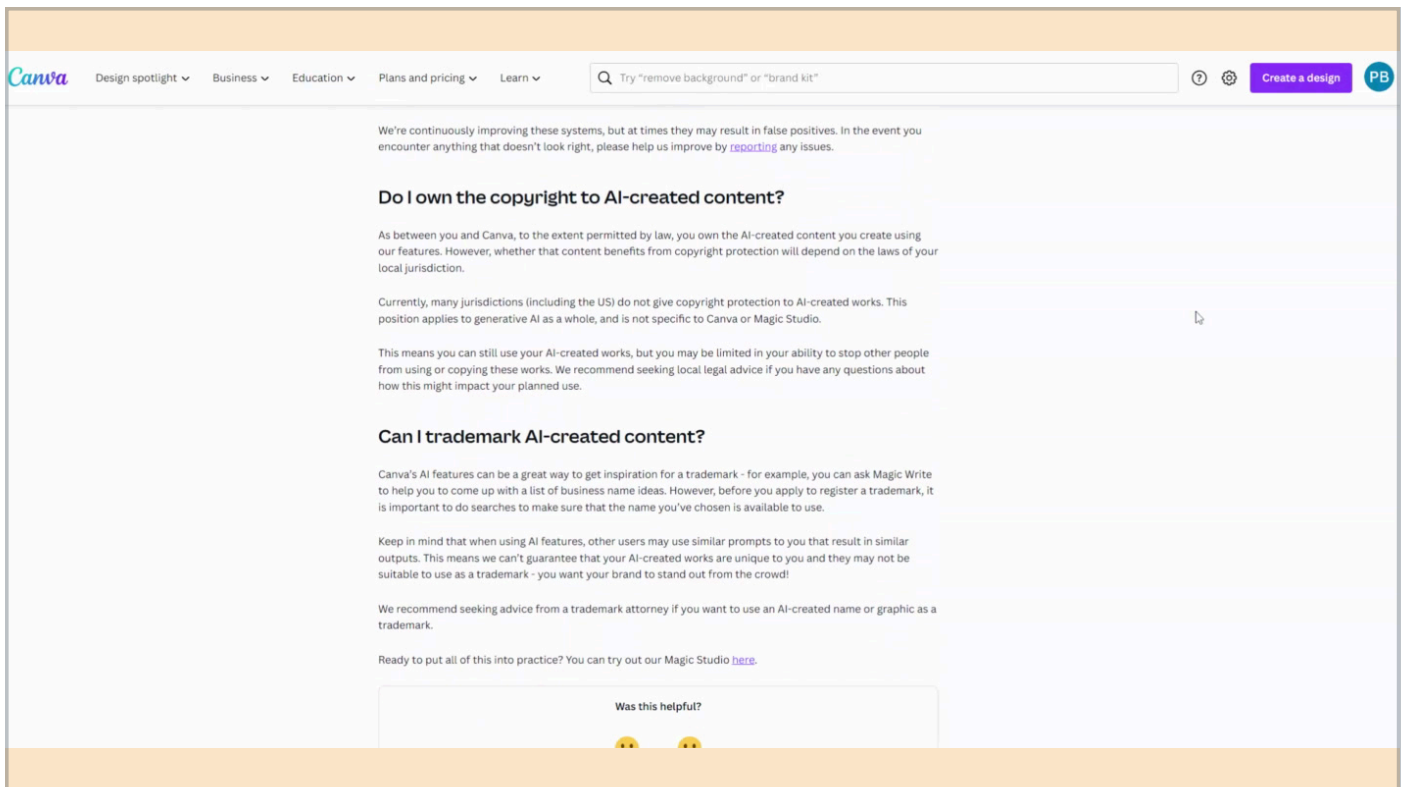

Canva is SOC2 Type I and ISO 27001 certified, mandating regular security audits. It also runs a Bug Bounty Program, encouraging security experts to find vulnerabilities, showcasing its commitment to robust security and ethical practices. This initiative, emphasizing transparency and accountability, is vital for protecting student data in educational settings, bolstering trust in Canva's AI features.

5

Bias and Fairness

Where does Canva fall?

Canva moderates content to tackle AI bias and recognizes fairness varies across cultures. Despite efforts and regular audits, fully eliminating bias is challenging. Canva's focus on fairness in education calls for continuous monitoring to guarantee equal access for all users.

6

Conclusions and the Future

So, is Canva in AIED a good thing?

Questions and Suggestions

Transparency in AI Training

Datasets and Principles? Methodologies?

Effectiveness of Reporting Mechanisms

How practical and efficient are their content reporting mechanisms?

User education on identifying and reporting content

Having done a deep dive into Canva's AI-related security measures, here are some critiques and suggestions that come to mind:

1. AI Training Transparency: Enhancing transparency about AI training data and principles could build trust. Clarifying AI decision-making processes could lead to more ethical use.

2. Reporting Mechanism Effectiveness: Evaluating and enhancing the effectiveness of Canva's reporting mechanisms, alongside better user guidance on managing inappropriate content, could foster more ethical usage.

Explainability

Using Canva's visual capabilities to demystify AI?

Ribera, M. & Lapedriza, A. (2019) Can we do better explanations? A proposal of user-centred explainable AI. In Joint Proceedings of the ACM IUI 2019 Workshops, Los Angeles, CA.7 pages. See <http://ceur-ws.org/Vol-2327/IUI19WS-ExSS2019-12.pdf>

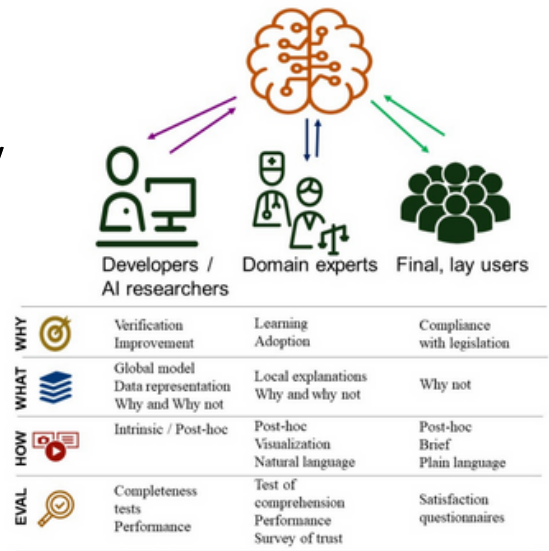

Figure 1: The system targets explanations to different types of user, taking into account their different goals, and providing relevant (Grice 3rd maxim) and customized information to them (Grice 2nd and 4th maxim), as described in section 2. Evaluation methods are also tailored to each explanation

Given Canva's expertise in visual communication, presenting this guidance through visually compelling materials could not only align with Canva's strengths but also improve user engagement and comprehension, thereby elevating the platform's commitment to a safe and respectful user experience (Ribera, 2019).

Questions and Suggestions

Evaluating Bias Mitigation Efforts

Concrete examples? Is there a "black box"?

Creator Compensation Insights

Mitigating the issue of fair compensation for creators in the AI space
Compensation structures? Selection criteria? Impact on educational content diversity?

3. Evaluating Bias Mitigation Efforts: Demonstrating the impact of Canva's bias reduction efforts with concrete examples would clarify their effectiveness. While AI algorithms often remain confidential, more transparency could alleviate the "black box" issue and build trust. Success stories of bias mitigation could guide ongoing improvements in fairness.
4. Creator Compensation Insights: Addressing fair compensation for AI-generated content creators is crucial. The Canva Education Creators program supports and rewards educators, but further details on compensation practices and selection criteria could lead to broader industry standards for valuing creative work in education.

Questions and Suggestions

Adherence to Privacy and Compliance Standards

Future Expansions and Edtech Directions

Outside of the US? Higher ed considerations?

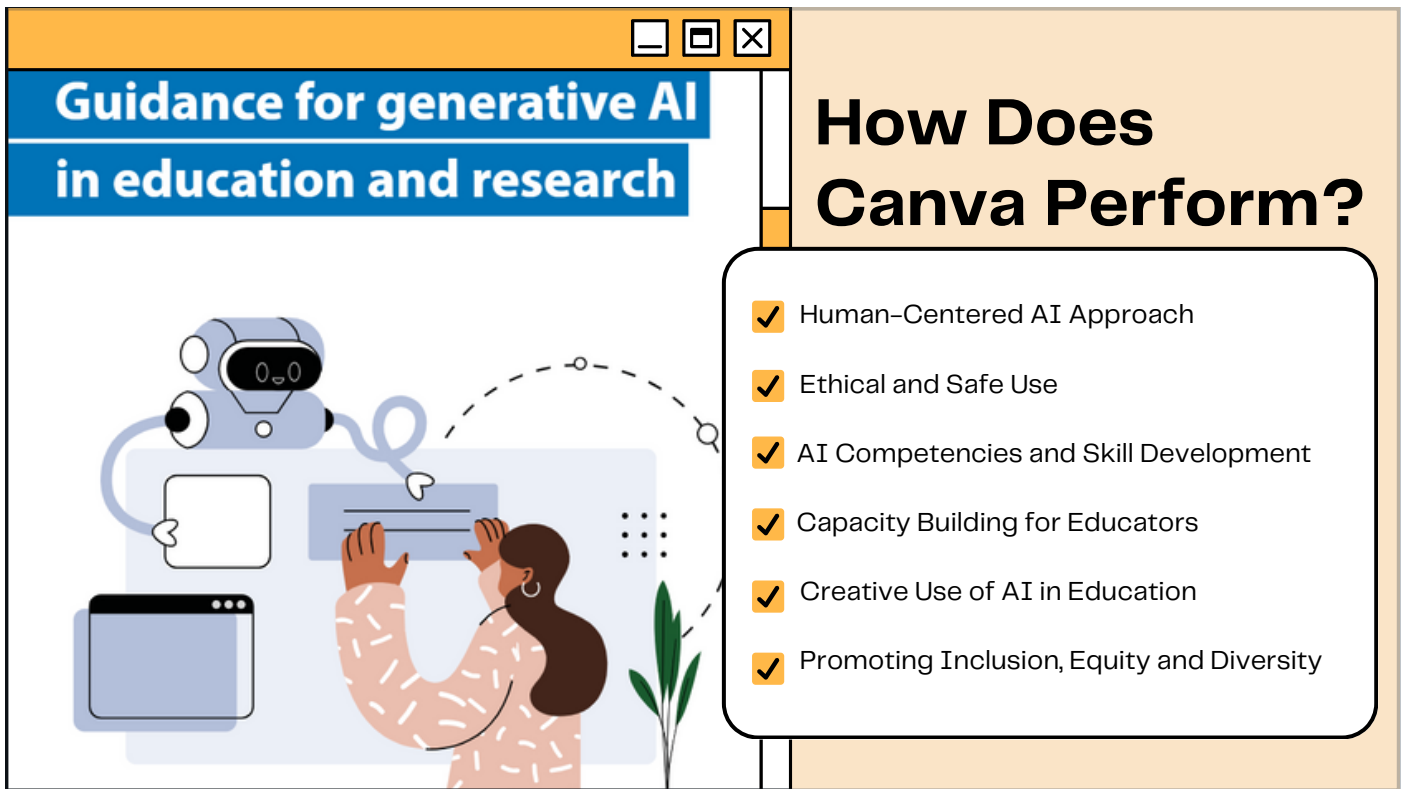

Long-term studies – Visuals? Retention? Learning Outcomes?

“Makerspaces” and the “Maker Movement”

Canva for Campus expansion

5. Adherence to Privacy and Compliance Standards: Detailing and expanding operational compliance to higher ed and internationally and its user impact could reassure users of its dedication to education security.

Future Expansions: ongoing studies are needed on AI tools' impact on learning and engagement. Interest also lies in Canva's contribution to the maker movement and the development of Canva for Campus.
